# Sharefest Logic Model

**INPUT**  
(TARGET PARTICIPANTS)

- Young adults in Los Angeles with high barriers to achieve traditional college and career outcomes.

**ACTIVITIES**

- Socio-Emotional Learning
- Leadership Training
- Credit Recovery
- College/Career Planning
- Mentoring
- Community Service

**OUTCOMES**

- **OUTCOME 1**: 80% of Sharefest youth increase power and autonomy  
  **Description**: Just as important as material wealth are power and autonomy — a person’s sense of control over the trajectory of their lives — and being valued in the community — their sense of belonging.

- **OUTCOME 2**: 70% of Sharefest youth increase social connectedness  
  **Description**: Social connectedness is a person’s relationships with other people and groups. Youth will feel valued in their community, develop a sense of belonging, and increase their social capital.

- **OUTCOME 3**: Sharefest youth will reduce college/career barriers  
  **Description**: This outcome includes measures of progress toward increasing educational attainment and can articulate college and career pathways.

**IMPACT**

- Young adults will realize their ability to transform their future and lead their communities.
